

Client Agreement

NetworkAiBot · Effective 5 September 2026 · English

1. The parties

This agreement is between you (the “Member”) and NetworkAiBot, operated at networkaibot.com (the “Platform”). By creating an account, staking USDT, or using any NetworkAiBot service, you accept these terms.

2. The service

NetworkAiBot provides access to automated AI trading bots and a published staking plan. Members choose a bot package, fund it in USDT on BEP20, and receive platform-defined daily returns together with referral, binary, and rank rewards as described in the English business plan.

3. Eligibility

- You must be at least 18 years old and legally able to enter a contract.
- You are responsible for any tax, reporting, or local-law obligation in your jurisdiction.
- One natural person may hold one member account unless the Platform agrees otherwise in writing.

4. Stakes and packages

The minimum stake is \$500 USDT. Packages, daily bands, binary caps, and the 300-day contract length are those published on the Platform and in the English business plan. Figures on marketing pages match the live payout engine. Past performance does not guarantee future results.

5. Wallets and withdrawals

Income, Spot, and Bonus wallets are available for withdrawal every day, subject to a \$1 USDT minimum. A 5% fee applies to trading profit. Commission, bonus income, and returned principal withdraw fee-free. Payouts are sent in USDT on BEP20 to the wallet you register. Network fees and destination errors are yours.

6. Risk

Automated trading and digital-asset staking involve a real risk of loss, including loss of the amount staked. The Platform does not provide investment, tax, or legal advice. You stake only capital you can afford to lose.

7. Account security

You must keep login credentials confidential and enable any security controls the Platform offers. Actions taken from your account are treated as yours until you notify support of a compromise.

8. Suspension

NetworkAiBot may suspend or close an account that breaches this agreement, fails verification, or is reasonably believed to be used for fraud, abuse of the referral tree, or unlawful activity.

9. Contact
