

Privacy Policy

NetworkAiBot · Effective 5 September 2026 · English

1. Who we are

NetworkAiBot (networkaibot.com) is the controller of personal data collected through the website, member panel, and support channels. Contact: support@networkaibot.com.

2. Data we collect

- Account details: name, email, password hash, referral placement, and wallet addresses.
- Transaction records: deposits, stakes, commissions, ranks, and withdrawals.
- Technical data: IP address, device, and basic usage logs needed to secure the service.
- Support messages you send to our team.

3. Why we use it

We use this data to operate your account, place you in the binary tree, pay published incomes, prevent abuse, meet anti-money-laundering checks, and reply to support requests. We do not sell member lists.

4. Sharing

We share data with payment processors (including crypto payout providers), hosting and email vendors, and authorities when the law requires it. Processors may only use the data to provide their service to us.

5. Retention

Account and ledger records are kept for as long as the account exists and for a further period needed for audit, dispute, and legal obligations. You may ask for a copy or a correction of your data.

6. Your choices

You may update profile details in the member panel or email support@networkaibot.com. Closing an account does not erase records we must keep for financial or legal reasons.

7. Security

We use access controls, encrypted transport, and least-privilege hosting. No online service is perfectly secure; you should also protect your own devices and withdrawal wallets.
